

Managing Medicare Claims

The purpose of this guide is to give details on how to manage the different types of claims in Bp Allied. This is applicable to any customer who is using Medicare Online Claiming within Bp Allied

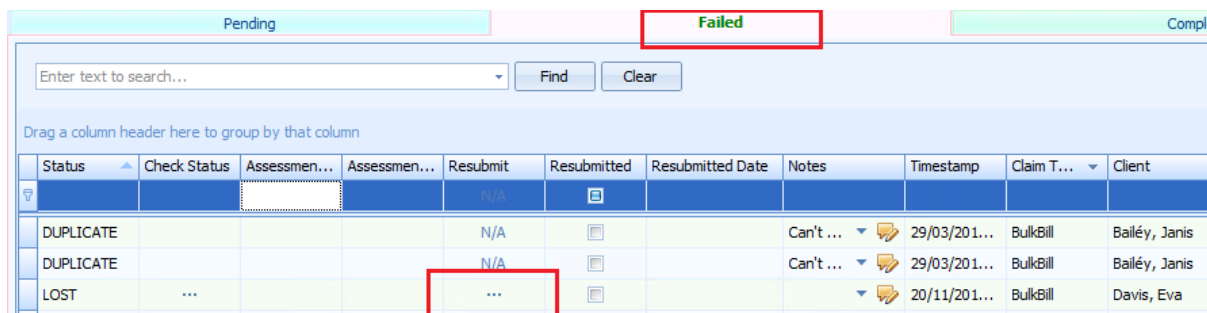

Bulk Bill & DVA

Creating Claims

Bulk Bill and DVA Claims are created when an Invoice payment is made. Information on creating these claims can be found [here](#) and [here](#).

Resubmitting Claims

Bulk Bill and DVA Claims are resubmitted by clicking the **Resubmit** button in the **Failed** tab.

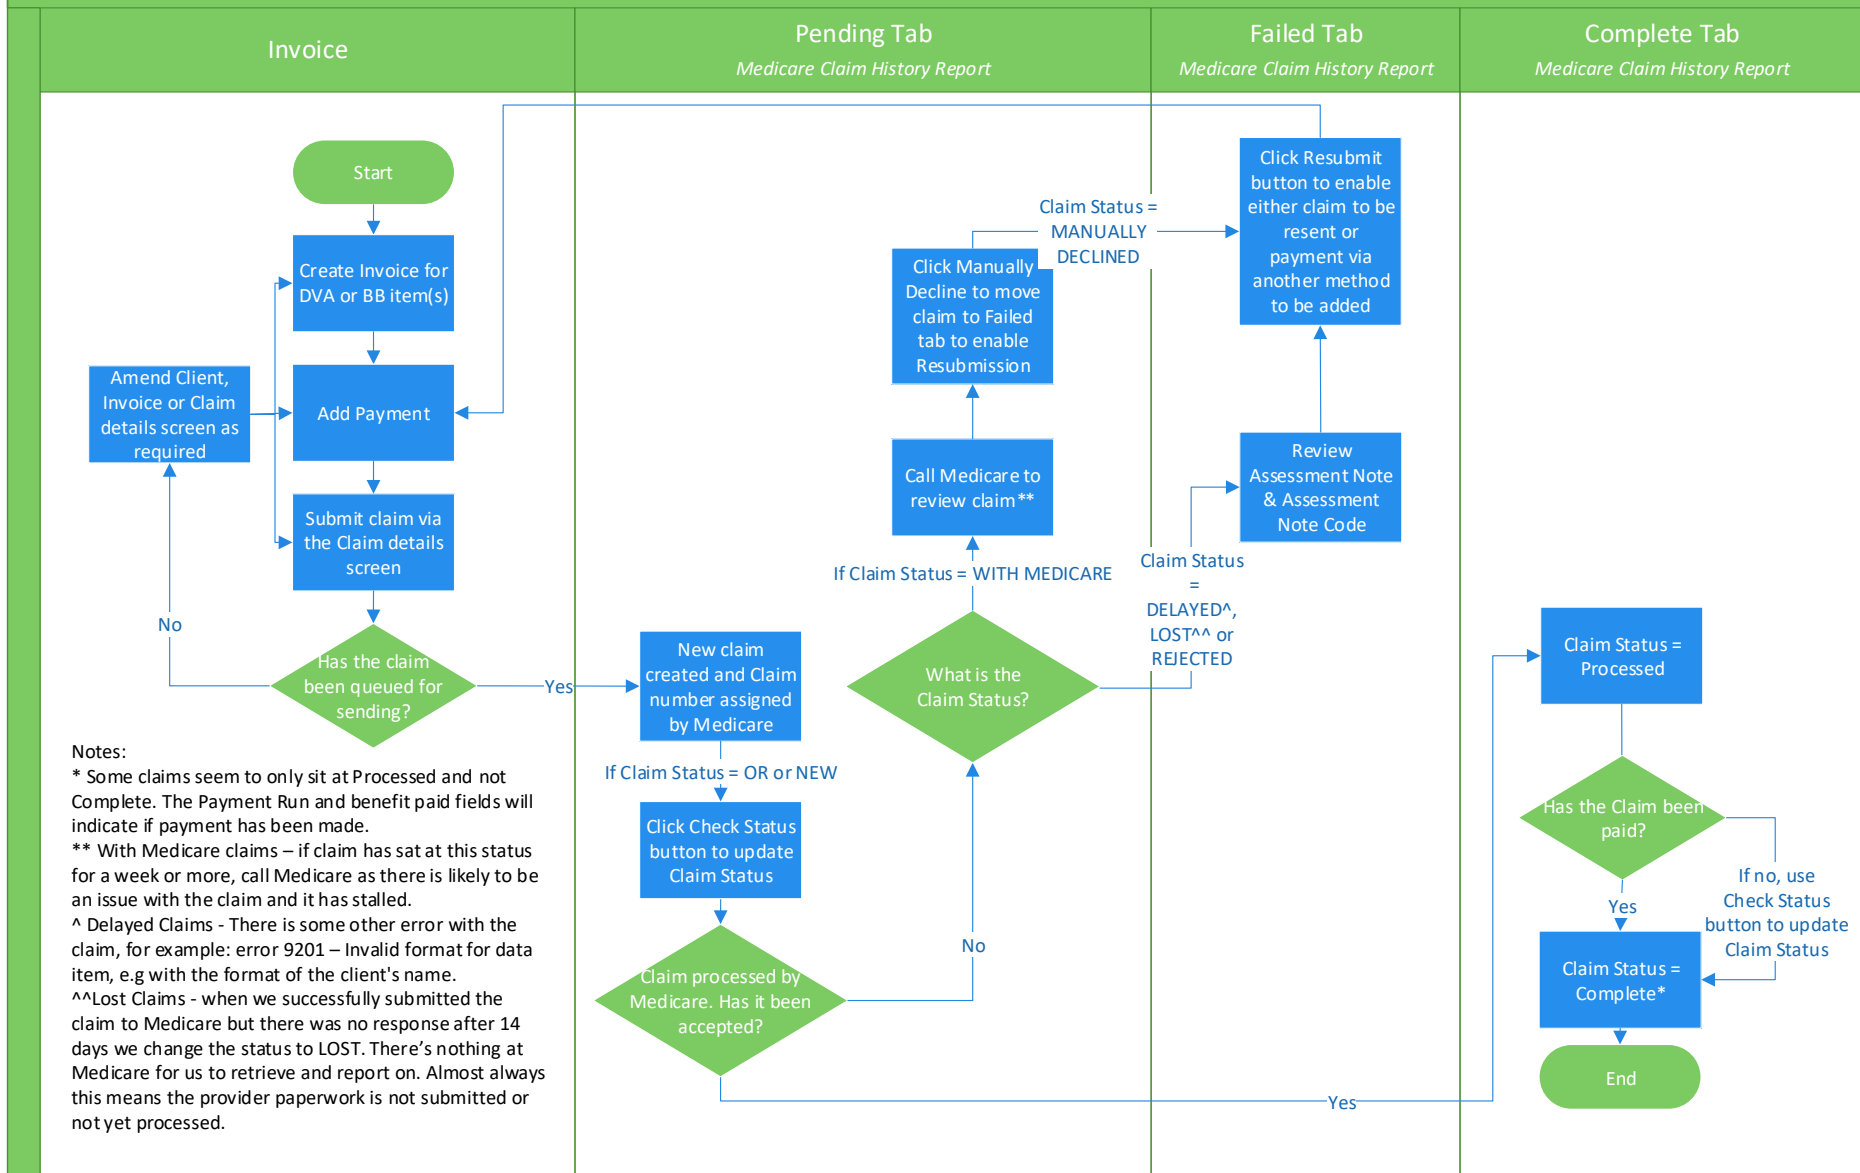

Status	Check Status	Assessmen...	Assessmen...	Resubmit	Resubmitted	Resubmitted Date	Notes	Timestamp	Claim T...	Client
DUPLICATE				N/A			Can't ...	29/03/201...	BulkBill	Bailley, Janis
DUPLICATE				N/A			Can't ...	29/03/201...	BulkBill	Bailley, Janis
LOST				20/11/201...	BulkBill	Davis, Eva

Use the **Assessment Code** and **Assessment Code Note** along with the information from Medicare and DVA to ascertain why a claim has been rejected. Details of the rejection codes can be found for Medicare [here](#) for common rejection codes and [here](#) for details on all reason codes. DVA rejection code information can be found [here](#).

Full details on using the resubmission process can be found [here](#).

Bulk Bill & DVA Claim Workflow

Patient Claims

Creating Claims

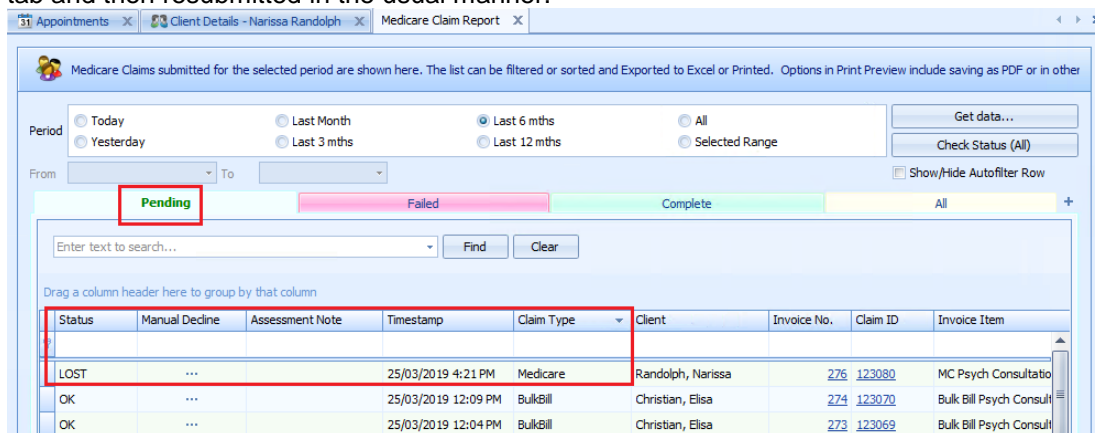

Patient claims are managed differently to Bulk Bill & DVA claims because full payment from the Client is received at the time of the claim and the Medicare rebate from these claims is not received by the practice. Information such as if the claim has been paid by Medicare is not available for us to feed back into Bp Allied, hence a Patient Claim will never get a Claim Status of Processed or Complete. All Patient claims sit in the Pending tab (*this is new in V6 SP3*).

Information on creating a patient claim can be found [here](#). Note: Patient Claims have a Claim Type = Medicare.

Resubmitting Claims

These claims cannot be resubmitted in the same manner as Bulk Bill or DVA claims. Limited information comes back via the Medicare API on the status of these claims and often it will be a client that will report an issue but the status will not indicate this.

To be able to resubmit a claim that has stalled there is a special function on the **Pending** this tab that allows a patient claim to be **Manually Declined** based on the information received from your client. This overrides the resubmit function not available to a Patient Claim. From here the claim moves to the **Failed** tab and then resubmitted in the usual manner.

Medicare Claims submitted for the selected period are shown here. The list can be filtered or sorted and Exported to Excel or Printed. Options in Print Preview include saving as PDF or in other

Period: Today Last Month Last 6 mths All
 Yesterday Last 3 mths Last 12 mths Selected Range

Check Status (All)

Enter text to search... Find Clear

Drag a column header here to group by that column

Status	Manual Decline	Assessment Note	Timestamp	Claim Type	Client	Invoice No.	Claim ID	Invoice Item
LOST	...		25/03/2019 4:21 PM	Medicare	Randolph, Narissa	276	123080	MC Psych Consultatio
OK	...		25/03/2019 12:09 PM	BulkBill	Christian, Elisa	274	123070	Bulk Bill Psych Consult
OK	...		25/03/2019 12:04 PM	BulkBill	Christian, Elisa	273	123069	Bulk Bill Psych Consult

Occasionally, a status of **With Medicare, Delayed** or **Lost** can be returned if there is a problem with details submitted with the claim. These patient claims can also be viewed on the **Pending** tab to be able to make use of the **Manual decline** function.

Full details on using the manual decline process can be found [here](#).

Patient Claim Workflow (Claim Type = Medicare)
